Mapping Grand Canyon Conference
February 28, 2019 at 8:00 AM

The Mapping Grand Canyon Conference explores the art, science, and practice of Grand Canyon cartography. Join this celebration and critical examination of the cartographic history of a global landscape icon.

Free and open to all, the conference promises a full two-day [program](#) of map-based story-telling, and transdisciplinary analysis, state-of-the-art geospatial and cartographic demonstrations, engaging hands-on activities, and open community dialogue.

100 years of Grand Canyon National Park

Portions of the Grand Canyon gained protection as a United States national park in 1919. A century later, Grand Canyon National Park celebrates its centennial -- the park is turning 100 years old! The Mapping Grand Canyon Conference is **an official Grand Canyon National Park centennial event**.

150 years since Powell

John Wesley Powell's famous 1869 expedition marked the **first significant geo-scientific survey of the Grand Canyon**. While none of the maps produced during that first expedition survived the journey, his subsequent explorations initiated the modern era of mapping, knowing, and imagining the geography of the region.
